## Writing

Holidays are the most tremendous parts of the school year. I think every child wants to have longer holidays and less studying days. In my opinion, it will never happen. But we can discuss such question as should students have a long summer holiday or should terms be longer. I know that summer holiday is the longest period of students' resting <sup>time</sup> and it's the loveliest holiday for them, but I think it should be shorter. At first, it would be better for learning. Students don't have any motivation for studying process after summer holidays. They even can not remember some themes that they were studying last year. Then, <sup>as I know,</sup> students sometimes don't know what they can do <sup>during summer holiday</sup> and how they should spend their free time. <sup>Free time</sup> leisure activities <sup>is</sup> are always better when we spend it without laziness. Leisure activities <sup>the best</sup> can help us to improve ourselves. In my opinion, <sup>leisure activities</sup> can be only in winter <sup>such as celebration of New Year and doing winter sports</sup>. So I consider that winter holidays should be longer. After that, I can say that the shorter summer holiday means longer school year. So it can be helpful for students who <sup>will</sup> graduate to have <sup>a</sup> better preparation for final exams, because they <sup>would</sup> have more time. Finally, I want to say <sup>that,</sup> the main aim of students is not <sup>themselves</sup> to live looking forward to holidays. Students should concentrate <sup>to</sup> their studying process.

$$K_1 - 3 - K_2 - 1 - K_3 - 2 = 80$$
